Listing of claims:

Claim 1 (currently amended): A belt drive for a machine for printing images on a flat printing material, comprising:

a belt for revolving during operation, said belt defining a longitudinal direction and a transverse direction, said belt having two protruding edges oriented in the longitudinal direction of said belt and being opposite one another in the transverse direction of said belt, said-belt having a non-constant modulus of clasticity; and

a belt guide having stops with shaped surfaces acting on said two protruding edges of said belt;

said shaped surfaces being selected from a group consisting of inclined surfaces and concavely curved surfaces.

Claim 2 (withdrawn): The belt drive according to claim 1, wherein said stops remain stationary with respect to the belt revolving during operation.
